August 28, 2007

Raystown Lake temporarily closes boat launch

RAYSTOWN LAKE — The U.S. Army Corps of Engineers at Raystown Lake will close Snyder's Run Boat Launch beginning Sept. 10, to allow construction crews to perform parking lot and road repairs. These repairs will address severe drainage issues at the launch area that occur during heavy rain storms.

Lake officials anticipate the recreation area should only remain closed for a maximum of four weeks, weather permitting, and will reopen Snyder's Run Boat Launch as soon as the work is complete.

Park visitors can still gain access to Raystown Lake by using the boat launches at Seven Points, Aitch, James Creek, Tatman Run, Shy Beaver and Weaver Falls.

For more information on the recreation area improvements visit: <http://raystown.nab.usace.army.mil/>
